online Academic programs.

About HADI

HUMAN AND DIGITAL INTERFACE

The Best Value of Online Education Platform

Our Online Education platform name is HADI.

HADI is the medium of connection between humans and technology, and serves as an educational hub for institutions of higher education to provide qualified learning values and experiences.

NEW MODEL CONCEPT AND VALUES

- Tearing down the unidirectional structure that works as a single process from admission to graduation, establishing flexible education.
- Overcoming the bias in regional recruitment and providing pliability in career selection.
- Obtaining opportunities by changing the perspective of technology and taking advantage of the changes in the industrial ecosystem.
- Maximizing the operation of education and content diversity.

GET UNIVERSITY STARTED OFF RIGHT!

Some students entering college know exactly what they want to do with the rest of their lives. On the other hand, some are still growing and changing. Uncertainty is common and you don't have to wait before you begin your post secondary schooling. HADI is designed to let you explore several different concentrations while still acquiring university credit from the comfort of your own home. Take lectures and gain credits in prerequisite classes required for many degrees. In

your fourth semester, highlight a specific field and receive pre-major courses within that discipline as you prepare to transfer to one of our global partners. You may focus in the areas of Business & Social Science, Software & IT, or Engineering & Science.

After completing your fourth semester, transfer into to one of our global partners to complete the program, face to face. Creating a hybrid format in this way allows students to get all the benefits of a traditional degree with the convenience and savings of an online program. Get a jump start on your bachelor's degree in **Interdisciplinary Studies**.

Obtaining the ability to plan and manage learning on your own when entering a major

Having an open mind that can understand and interconnect information in various fields through the construction of various basic knowledge

WHY SHOULD YOU CHOOSE HADI?

- ▶ No Visa Issues
- ▶ Affordable Tuition Fee
- ▶ Highly Qualified Faculty
- ▶ Accessibility of Time and Place
- ▶ Study at your own Pace
- ▶ Transfer opportunities to Universities worldwide
- ▶ Continue in your Profession

FEATURES

Provides the core competencies students need for success

HADI cultivates the talents necessary for future society's success through action-based and team-based learning.

The curriculum prioritizes learning essential competencies for core talents in the 4th industrial era, such as STEM education, design thinking, and soft skills.

HADI students who earn their degrees online develop unique ways of understanding, experiencing, and applying their education, often leading to greater career success and advancement.

Providing the HADI Experience to Students Everywhere

We encourage inquiry and active learning to help our students gather knowledge to solve problems, make decisions, and define values around real-world issues that apply to their work and community environment.

We are collaborating with outstanding faculty to develop unique programs that provide rich educational opportunities suited to our online learners' market-based needs and rich professional experiences.

100% online-based hybrid education

We invite prominent scholars worldwide to provide excellent online education experiences while providing hybrid education through various offline programs such as corporate projects, discussions, team projects, and mock start-ups.

Advanced Online Education platform: HADI

HADI is an advanced learning space for students to transfer to our highly qualified partner universities worldwide, where you can choose all the higher education services you need to prepare for the opportunities you need.

PROGRAM CURRICULUM

Our faculty have designed a curriculum where the first two years is structured around the STEM education, creative and independent thinking, and soft skill development. Prominent scholars can be invited from all over the world to provide excellent online education experiences while providing hybrid education through various offline programs such as corporate projects, discussions, team projects, and mock start-ups. Equipping each Woosong online student with these tools is crucial to your future success. Find your niche and

begin your university career with our HADI Online program.

Our curriculum has been designed to cultivate intrinsic learners who can plan and manage their education upon enrolling in a chosen field. Your first two years with HADI Online provides a solid base of knowledge in diverse areas. This allows you to interconnect information and gain a fuller understanding of your area of interest before you commit to any one program.

After you complete your first two years with our HADI Online program, you can then transfer to one of our global partners to complete your degree in person.

COURSE LIST BY SEMESTER

1ST SEMESTER

Required Credits: 18		
Code	Course Title	Credit
HADI 101	Moral, Ethical and Social Responsibility	3
HADI 102	Diversity and Global Citizenship	3
HADI 103	User Experience Design and Development	3
HADI 104	Interpersonal Communication	3
HADI 105	Leadership and Teamwork	3
HADI 107	Linear Algebra	3
TBD	Community Service	Non-credit

2ND SEMESTER

Required Credits: 18		
Code	Course Title	Credit
HADI 108	Environmental Ethics	3
HADI 109	Positive Balance and Mental Health	3
HADI 110	Communication of UI/UX & People	3
HADI 112	Communication by Digital Tools	3
HADI 113	Writing and Reasoning	3
HADI 114	Statistics with SW Tools	3
HADI 115	Design Thinking Process	3
TBD	Internships	Non-credit

3RD SEMESTER

Required Credits: 18		
Code	Course Title	Credit
HADI 201	Python I	3
HADI 202	Algorithm Practice (Using SW Tools)	3
HADI 203	EXCEL, PPT and Others	3
HADI 204	Capstone Design in Digital Society (Elective course)	3
HADI 205	Entrepreneurship in Digital Transformation (Elective course)	3
HADI 206	Consulting Process I	3
HADI 207	Consulting Process II	3
TBD	Extra-Curricular (Mandatory)	Non-credit

SUMMER OR WINTER SESSION Optional

Required Credits: Elective Courses (Optional)		
Code	Course Title	Credit
HADI 230	Calculus	3
HADI 231	Financial Accounting	3
HADI 232	Introduction to Financial Management	3
HADI 233	Quantitative Methods	3

4TH SEMESTER Option 1 - Business and Social Science

Required Credits: 18		
Code	Course Title	Credit
HADI 208	Microeconomics	3
HADI 209	Introduction to Accounting	3
HADI 210	Principles of Marketing	3
HADI 211	People and Organization	3
HADI 212	Psychology for Business	3
HADI 213	Sociology for Business	3

4TH SEMESTER Option 2 – Software & IT

Required Credits: 18		
Code	Course Title	Credit
HADI 214	Discrete Math and Mathematical Reasoning	3
HADI 215	Introduction to Algorithms & Data Structure	3
HADI 216	Introduction to Database	3
HADI 217	Computer Programming with Python	3
HADI 218	Object-oriented Design and Programming	3
HADI 219	Principles of Machine Learning	3

4TH SEMESTER Option 3 – Science and Engineering

Required Credits: 18		
Code	Course Title	Credit
HADI 220	Applied Physics	3
HADI 221	Chemistry	3
HADI 222	Principle of Fluid Dynamics	3
HADI 223	Principle of Thermodynamics	3
HADI 224	Engineering Mathematics	3
HADI 225	Statistics: Understanding Data Analysis for Engineer and Scientists	3

COURSE DESCRIPTIONS

HADI 101 • Moral, Ethical and Social Responsibility		
Understand how Moral Responsibility & Social Responsibility in the form of Corporate Social Responsibility (CSR)-based management is key to an organization's sustainable growth strategy. In this course, students will learn of some of the major ethical approaches to decision-making, such as utilitarianism, deontology, and virtue ethics. These approaches will then be drawn upon to understand some of the issues raised by CSR.	Credit Hours	3
	Study Area	Future Society & Competency - Ethics and Justice

HADI 102 • Diversity and Global Citizenship		
This course examines what it means to be a global citizen through diversity and global civic learning, and will think about what it means to navigate cultural differences in a globalized world. Drawing from a range of topics, students will learn about the forces and events that have shaped our world, and will critically assess our contemporary situation.	Credit Hours	3
	Study Area	Future Society & Competency - Ethics and Justice

HADI 103 • User Experience Design and Development		
Understand the analysis and procedures of experience for UX design. Learn how to use tools to develop and implement good design.	Credit Hours	3
	Study Area	Future Society & Competency - Human And Digital Interface

HADI 104 • Interpersonal Communication		
Understand the core skills (language, behavior, etc.) that are the basis of mutual communication, learn communicative interpersonal skills through practical examples and skill-building activities. Topics in this course will include, but are not limited to: self-presentation skills; various forms of communication to large audiences; website design; business writing and presentations.	Credit Hours	3
	Study Area	Communication and Collaboration

HADI 105 • Leadership and Teamwork		
Understand various self-management skills and problem-solving techniques and learn about teamwork-based work operation, planning, and collaboration based on mutual understanding between colleagues.	Credit Hours	3
	Study Area	Communication and Collaboration

HADI 107 • Linear Algebra		
Study Liner Algebra, which is the core of future data-based software technology.	Credit Hours	3
	Study Area	Creative/Design Thinking, Analytics - Analytics with Math

TBD - Community Service		
Understanding and consideration for the socially disadvantaged by visiting orphanages, nursing homes, and welfare facilities for the disabled.	Credit Hours	N/A
	Study Area	Non-credit course

HADI 108 • Environmental Ethics		
Understand the importance of the environment to future value, analyze characteristics and cases of various social enterprises based on corporate responsibility for the environment, and understand basic technology related to the environment.	Credit Hours	3
	Study Area	Future Society & Competency - Ethics and Justice

HADI 109 • Positive Balance and Mental Health		
This course examines the importance of work-life balance, and teaches students how to manage stress and maintain a healthy mindset. Since a healthy balance management and operational strategy for work-life balance is necessary, learn about whether individuals manage stress and maintain positive mindset.	Credit Hours	3
	Study Area	Future Society & Competency - Ethics and Justice

HADI 110 • Communication of UI/UX & People		
The significance in UI/UX highly rises in the days. Groupware-based online communication becomes universal, and the creation of necessary tools using simple apps by individuals is one the fore as well. Understand and practice UI/UX design strategies using various open source UI/UX design tools, reflecting the rising importance of these communication strategies.	Credit Hours	3
	Study Area	Future Society & Competency - Human And Digital Interface

HADI 112 • Communication by Digital Tools		
Understand collaboration using Whiteboard, the communication and collaboration strategies using various digital collaboration tools, and the utilization of open source-based collaboration tools that are actually available.	Credit Hours	3
	Study Area	Communication and Collaboration

HADI 113 • Writing and Reasoning		
Learn to write argumentative essays through the development of critical reading skills. Read various materials critically and use appropriate reference materials to describe and convey their opinions convincingly. Cultivate the matters to learn how to think and write important matters collectively, clearly and concisely.in a logical way	Credit Hours	3
	Study Area	Communication and Collaboration

HADI 114 • Statistics with SW Tools		
Study the basics of Statistics, and apply this knowledge using software packages. Statistics is the key in AI and data-based software society, so the capability to apply Statistics based on actual problems through various software tools such as the statistical functions of Excel will be crucial.	Credit Hours	3
	Study Area	Creative/Design Thinking, Analytics - Analytics with Math

HADI 115 • Design Thinking Process		
Design, analyze, and alleviate problems by seeking creative solutions using design process thinking. Through the analysis of certain situations, learn the entire process on seeking creative solutions along with the experience of defining and alleviating the problems.	Credit Hours	3
	Study Area	Creative/Design Thinking, Analytics - Design & planning for work

TBD • INTERNSHIPS		
Internships at companies are important, but part-time work will also be recognized as internships. This is because students need to know about the value of labor and the importance of making money on their own.	Credit Hours	N/A
	Study Area	Non-credit course

HADI 201 • PYTHON I		
Introduction to coding with Python .	Credit Hours	3
	Study Area	Software Skill - Coding Language (Phyton) + logic design for coding

HADI 202 • ALGORITHM PRACTICE (USING SW TOOLS)		
Practice and master the algorithms necessary for understanding software structure and software creation through various tools.	Credit Hours	3
	Study Area	Software Skill - Coding Language (Phyton) + logic design for coding

HADI 203 • EXCEL, PPT and Others		
Learn to use Excel and PPT-related technologies for analysis, presentation, and discussion.	Credit Hours	3
	Study Area	Work Competency - Working with SW Tools (Excel, PPT etc.)

HADI 204 • Capstone Design in Digital Society		
Work with a team to develop project-based solutions to concerns in the digital world. You will work closely with mentors who will provide feedback and help guide you through the process. Problem-solve and improve your work through presentations of your project-in-progress.	Credit Hours	3
	Study Area	Work Competency - Process for Project (Including actual Project Implementation) - Elective course

HADI 205 • Entrepreneurship in Digital Transformation		
Start-up preparation process in the era of digital transformation.	Credit Hours	3
	Study Area	Work Competency - Process for Project (Including actual Project Implementation) - Elective course

HADI 206 • Consulting Process I		
Secure a high level of research-logical thinking-persuasive expression that can be implemented to the entire progress of analyzing external problems and find solutions, facilitating the consulting process. and proceed to the same process as that of actual consultants.	Credit Hours	3
	Study Area	Creative/Design Thinking, Analytics - Define problem and Finding Solution in workplace

HADI 207 • Consulting Process II		
Operate the project according to the actual process.	Credit Hours	3
	Study Area	Creative/Design Thinking, Analytics - Define problem and Finding Solution in workplace

TBD • Extra-Curricular (Mandatory)		
It will consist of special lectures, contests, certificate courses, and humanities and social studies books or videos and submitting review reports.	Credit Hours	N/A
	Study Area	Business and Social Science (Pre-requisite core courses for specialization)

HADI 208 • Microeconomics		
This course is designed to help the students build an understanding of the economics of the market-place. In particular, the course focuses on microeconomic principles that demonstrate the role and limitations of both competitive and imperfectly competitive markets in motivating socially efficient consumer, business, and public sector choices.	Credit Hours	3
	Study Area	Business and Social Science (Pre-requisite core courses for specialization)

HADI 209 • Introduction to Accounting		
This course introduces students to financial statements and takes a practical approach to the accounting cycle. Students will learn various aspects of journal entry such as creating and posting entries, adjusting and closing entries. In addition, students will also learn how to create an income statement and balance sheet from journal entries. Students will be introduced to auditing and will learn about ethical issues in accounting.	Credit Hours	3
	Study Area	Business and Social Science (Pre-requisite core courses for specialization)

HADI 210 • Principles of Marketing		
This course provides from the management point of view, marketing as a system for the satisfaction of human wants and a catalyst of business activity. It examines different perspectives from producer to consumer and emphasizes the planning required for the efficient use of marketing tools in the development and expansion of markets. It concentrates on the principles, functions, and tools of marketing, including quantitative methods.	Credit Hours	3
	Study Area	Business and Social Science (Pre-requisite core courses for specialization)

HADI 211 • People and Organization		
This course deals with the essence of what managers do: planning, organizing, controlling and leading. The course is designed to provide the foundational knowledge and skills for managing people and organizations. Students will learn fundamental concepts, current trends and required skills over a broad range of topics such as motivating people, teamwork, human resource practices, self- management, communication and leadership. Students will also gain a basic appreciation for strategic planning, the importance of external and internal environments for management, control systems and how managers make decisions.	Credit Hours	3
	Study Area	Business and Social Science (Pre-requisite core courses for specialization)

HADI 212 • Psychology for Business		
This course examines the practice of improving work life by combining studies of human behavior with that of organizations. The practical applications include investigating how to make organizations and people therein more effective, creating productive relationships between people and organizations, and maintaining effective organizational practices.	Credit Hours	3
	Study Area	Business and Social Science (Pre-requisite core courses for specialization)

HADI 213 • Sociology for Business		
This course will introduce the students to the study of humankind's most important creation-- the social group. In this course, students will examine the various skills and techniques that sociologists employ when studying groups of people. They will then examine a wide variety of groups and the behaviors that characterize them.	Credit Hours	3
	Study Area	Business and Social Science (Pre-requisite core courses for specialization)

HADI 214 • Discrete Math and Mathematical Reasoning		
This course provides a very useful academic foundation for students majoring in computer-related studies or engineering to broaden their basic understanding and intuitively understand how it is applied in real problems. The concept of discrete mathematics is a combination of the concept of discrete and mathematics. Discrete mathematics thus deals with the world of logic, propositions, sets and digital numbers, proofs, relationships, functions, graphs, trees, permutations, discrete probabilities, recursive, matrix and matrix equations, Boolean algebra, automata, and formal language.	Credit Hours	3
	Study Area	Software & IT (Pre-requisite core courses for specialization)

HADI 215 • Introduction to Algorithms & Data Structure		
The program is based on processing the input data and outputting the result. The core of programming is to effectively express and process the data in question on the program. For more efficient program writing, we study various data representation forms such as array, stack, queue, connection list, tree, graph, and analyze the concepts, characteristics, and pros and cons of sorting and search algorithms to learn efficient data processing methods based on C language. We learn various computational algorithms, analyze and evaluate algorithms in terms of computational complexity.	Credit Hours	3
	Study Area	Software & IT (Pre-requisite core courses for specialization)

HADI 216 • Introduction to Database		
A database is a collection of information that is integrated and managed for the purpose of being shared and used by multiple people. This course will provide an introductory look at database concepts, emphasizing the relational database model. Subject covered are the following: data models, query languages, transactions, parallel data processing, and database as a service.	Credit Hours	3
	Study Area	Software & IT (Pre-requisite core courses for specialization)

HADI 217 • Computer Programming with Python		
This course deals with applications of Python programming language to business problems. Topics include how to get started with Python, numbers and strings, loops, functions, lists, data files, summarizing and visualizing data, and big data applications.	Credit Hours	3
	Study Area	Software & IT (Pre-requisite core courses for specialization)

HADI 218 • OBJECT-ORIENTED DESIGN AND PROGRAMMING		
This course introduces advanced programming skills using Python and focuses on the core concepts and design of object-oriented programming, which are essential components for organizing and integrating large-scale software architectures. This course focuses on understanding and practical mastery of object-oriented concepts such as classes, objects, data abstraction, methods, method overloading, inheritance, and polymorphism. Review the actual applications in the data science area found in stacks, queues, lists, and trees.	Credit Hours	3
	Study Area	Software & IT (Pre-requisite core courses for specialization)

HADI 219 • Principles of Machine Learning		
This course introduces several fundamental concepts and methods for machine learning. The objective is to familiarize students with some basic machine learning algorithms/techniques and their applications. The course also covers general principles and approaches related to analyzing and handling big data sets.	Credit Hours	3
	Study Area	Software & IT (Pre-requisite core courses for specialization)

HADI 220 • Applied Physics		
Establish basic concepts related to natural phenomena. Through lectures on mechanics, waves, and thermodynamics, one-dimensional motion, vector and relative velocity, Newton's laws of motion, circular motion and rotational motion of rigid bodies, motion of objects, waves, vibrations, and thermodynamics are understood. By understanding the principles and concepts of electricity and magnetism, student acquire the basic physical concepts and principles related to electromagnetism.	Credit Hours	3
	Study Area	Science and Engineering (Pre-requisite core courses for specialization)

HADI 221 • Chemistry		
Understand the structure, properties, and interactions of matter at the macroscopic and microscopic levels. The knowledge and scientific research methods acquired in the process of material inquiry can be applied to professional judgment in the field of major and daily life. Based on the basic concepts and laws of chemistry, the structure of atoms, and quantum mechanical understanding of chemical bonds, the content identifies the forces between liquids, solids, and molecules and understands the principles of chemical reactions.	Credit Hours	3
	Study Area	Science and Engineering (Pre-requisite core courses for specialization)

HADI 222 • Principle of Fluid Dynamics		
Learn the physical properties of fluids and the changes in the amount of fluids in units and stationary fluids and the continuous and kinetic equations of fluids to understand the properties of fluids, the basic equations of fluids, and the dimensional analysis of flows. It induces the basic equations governing the motion of fluids and cultivates the ability to apply them to major phenomena.	Credit Hours	3
	Study Area	Science and Engineering (Pre-requisite core courses for specialization)

HADI 223 • Principle of Thermodynamics		
This course introduces the concepts and terms of thermodynamics, the properties of materials, energy, work and heat transfer, thermodynamic state quantity of pure materials, The First and Second laws of thermodynamics, gas compression, steam source cycle, refrigeration cycle, gas and steam flow, combustion and electrothermal analysis, and micro-thermodynamics.	Credit Hours	3
	Study Area	Science and Engineering (Pre-requisite core courses for specialization)

HADI 224 • Engineering Mathematics		
This is a basic compulsory course for studying engineering, and studies how to mathematically model engineering problems and find solutions to them. Through this subject, we learn about the first-order ODEs and second-order linear ODEs necessary to interpret the dynamic system and obtain responses, and also learn about the higher-order ODEs. We also learn about Series solutions and the implications and applications of Laplace transforms.	Credit Hours	3
	Study Area	Science and Engineering (Pre-requisite core courses for specialization)

HADI 225 • Statistics: Understanding Data Analysis for Engineer and Scientists		
Students learn about statistics and statistical concepts, summarizing and organizing data, probability and probability distribution, probability variables, expectations, variance, discrete distribution, continuous distribution, statistical reasoning for sampling and sample analysis, hypothesis tests for large and small samples, and analysis of variance. The demand for processing large amounts of data is increasing in modern society, so it is possible to learn statistical techniques for effectively processing various data, and to acquire statistical methods used in scientific research.	Credit Hours	3
	Study Area	Science and Engineering (Pre-requisite core courses for specialization)

HADI 230 • Calculus		
Calculus presents powerful problem-solving methods not only in natural sciences such as mathematics, physics, engineering, and medicine, but also in social sciences such as economics. As it presents more efficient methods and enables more in-depth handling of difficult application problems, the application field is becoming more and more extensive as science develops. This course covers the basic theories, concepts and application methods of calculus.	Credit Hours	3
	Summer or Winter Session (Pre-requisite core courses for specialization)	

HADI 231 • Financial Accounting		
The purpose of financial accounting is to provide information about the company to external users through financial statements. This lecture is divided into accounting principles, intermediate accounting, and advanced accounting depending on the level of difficulty and scope. It is halfway between accounting principles and intermediate accounting. Therefore, instead of focusing on the process of recording accounting transactions and preparing financial statements from the standpoint of financial statement preparers, this lecture focuses on the use of financial statement information from the standpoint of users of financial statements.	Credit Hours	3
	Summer or Winter Session (Pre-requisite core courses for specialization)	

HADI 232 • Introduction to Financial Management		
This course is an introduction to the area of Finance. It includes introducing topics for fundamental base of finance such as risk and return, time value of money, and bond and stock valuation. It also includes providing both a theoretical and a practical perspective on corporate finance. Students learn main functions of financial management, financial statement analysis, investment decision-making (i.e., capital budgeting, cost of capital, capital structure).	Credit Hours	3
	Summer or Winter Session (Pre-requisite core courses for specialization)	

HADI 233 • Quantitative Methods		
This course is an introduction to the area of Management Science (MS). MS indicates a scientific approach to solving managerial problems. The course will cover fundamental MS tools and principles such as Linear Programming, Transportation & Network Problems, Integer Programming, Waiting Time Model, and Decision Theory, which are critical to measuring business issues objectively. Emphasis will be given to the quantitative analysis of problems arising in the management both, at the local and enterprise level.	Credit Hours	3
	Summer or Winter Session (Pre-requisite core courses for specialization)	

Structured to allow entry into 50+ Worldwide study destinations.

Through two years of HADI's excellent online education, students can design careers that suit their aptitude and have a successful bachelor's life by transferring to the university of their choice through sufficient preparation. HADI Online Program also provides great financial benefits to students who wish to study abroad and obtain a degree from overseas universities.

1.

2 years online programs
INNOVATED PLATFORM

2.

Apply
CONVENIENCE

3.

2 years study abroad (Dual Degree)
GREAT OPPORTUNITIES

GLOBAL PARTNERSHIPS

HADI has developed global partnerships to provide the best opportunity for our students to succeed. After completing two years of study through HADI online, students can transfer to Woosong University, or one of our global partners to complete your undergraduate degree in person.

 Woosong University	 International University of Applied Science	 Burgundy School of Business
 University of Victoria	 Hogeschool VIVES	 Feng Chia University
 CTBC Business School	 Shih Chien University	 I-Shou University
 Nanjing University	 Sichuan University	 Beijing Institute of Technology (BIT)
 Soochow University	 Beijing Foreign Studies University	 Shenzhen University
 Xi'an International Studies University	 Chongqing Technology And Business University	

TUITION AND FEES

Our HADI online program is created around an affordable tuition that will allow you to focus on studies.

The tuition fee for the second to fourth semesters is reflected in the grade results for the previous semester.

When transferring to the 3rd year, tuition fees will be according to the student's program choice and the tuition policy of the partner university selected.

Enrollment Fee A one-time fee paid by all first semester students		USD 650
1st Semester		USD 1920
2nd Semester	GPA 3.5 Above	USD 1280
	GPA 3.0 Above	USD 1600
	GPA 3.0 Below	USD 1920
3rd Semester	GPA 3.5 Above	USD 1280
	GPA 3.0 Above	USD 1600
	GPA 3.0 Below	USD 1920
4th Semester	GPA 3.5 Above	USD 1280
	GPA 3.0 Above	USD 1600
	GPA 3.0 Below	USD 1920

 APPLICATION FEE • USD 50
 TUITION FEE • USD 1,920
 RESIDENCE FEE • USD 0
 LIVING COST • USD 0
 ENROLLMENT FEE • USD 650

* Tuition fees and other associated costs incurred during the study abroad in a partner university may vary.

* Enrollment fee is a one-time fee paid by all first-semester students.

ADMISSION

	Application Deadline	Online Classes Start
FALL	July 31	Early September
SPRING	January 31	Early March

EXPAND YOUR UNIVERSE

GREAT MINDS - GREAT IDEAS - INSPIRED LEARNING

Open your mind with some of the world's leading thinkers and academics who bring important issues to life with alacrity. Learn about Multiculturalism with Will Kymlicka, consider issues of Democracy with Jacques Ranciere, engage with Judith Butler in matters about Gender, and many more thought-provoking ideas. At your convenience.

Great Minds gives you access to globally recognized cutting-edge thinkers who will inspire you to learn more, to eagerly dive into the next lecture. No need for a visa or travel; our lectures are at your command wherever you are.

Woosong Online's **Great Minds** allows you to earn university credits at your own pace. From the comfort of your home or favorite coffee shop, enjoy inspiring lectures from prestigious thinkers who discuss topics that engage our globalizing world.

All you need is a Wi-Fi connection and your mind.
